SAM 2026 Statistical Analyses of Multi-Outcome data Bordeaux, France

Monday June 29th

Morning

One invited KEYNOTE Speech — Amphi Louis

9:15 - 10:15

Navigating the Crossroads of Statistics, Generative AI, and Genomic Health

Xihong Lin, Biostatistics, Harvard T.H. Chan School of Public Health

Session 1 — Amphi 10

Deep learning in survival analysis

Organizer: Lei Liu - lei.liu@wustl.edu

10:45 - 11:10

Deep Learning with Time-to-event Outcomes

Jon Steingrimsson - jon_steingrimsson@brown.edu

11:10 - 11:35

Neural Network Machine Regression (NNMR): A Deep Learning Framework for Uncovering High-order Synergistic Effects

Peter X Song - pxsong@umich.edu

11:35 - 12:00

Flexible Deep Learning Techniques for Survival Analysis with Data Integration

Kevin He - kevinhe@umich.edu

Session 2 — Amphi Louis

Early or intercurrent events in clinical trials

Organizer: Catherine Legrand
catherine.legrand@uclouvain.be

10:45 - 11:10

Joint Modeling of Longitudinal Health-Related Quality of Life Data in the Presence of Competing Dropout Risks

Philippe Lambert - p.lambert@uliege.be

11:10 - 11:35

A Joint Multi-State Model for Causal Mediation Analysis adjusting for treatment switching in Oncology

Georgios Kazantzidis - georgios.kazantzidis@roche.com

11:35 - 12:00

Estimation of inverse probability of censoring weights using shared parameter joint models for longitudinal and survival outcomes.

Luc Boone - luc.boone@eortc.org

12:00 - 12:25

Early outcome-based interim analyses in randomized clinical trials with long-term clinical endpoints

Tomasz Burzykowski - tomasz.burzykowski@iddi.com

Session 3 — Amphi 11

Trustworthy AI and Statistical Innovation for Complex Health Data

Organizer: Ying Wei - yw2148@cumc.columbia.edu
and TBD

10:45 - 11:10

Time-varying Quantile Regression with Multi-outcome Latent Groups

Ying Wei - yw2148@cumc.columbia.edu

11:10 - 11:35

Quantifying Fidelity in AI Persona Simulations

Kaizheng Wang - kaizheng.wang@columbia.ca

11:35 - 12:00

Trajectory Clustering via Spatial-Graph and LLM-Semantic Embeddings

Nan Lin - nlin@wustl.edu

12:00 - 12:25

~~**A Semiparametric Method for Addressing Under-Diagnosis Using Electronic Health Record Data**~~

~~*Jinbao Chen - jinboche@upenn.edu*~~

Session 4 — Amphi 12

Joint models with Bayesian inference

Organizer: Sangita Kulathinal
sangita.kulathinal@helsinki.fi

10:45 - 11:10

Bayesian estimating Transition Rates in Two-State Non-Homogeneous Markov Jump Processes with Intermittent Observations: An Honest Time Data Augmentation Approach

Etienne Sebag - etienne.sebag@helsinki.fi

11:10 - 11:35

A Bayesian partition model for multivariate functional data: discovering biological pathways by modelling the time course of gene expression level

Marion Kerioui - marion.kerioui@inserm.fr

11:35 - 12:00

Double inverse probability weighting for modeling sparsely measured longitudinal markers in presence of left and right truncation by death

Trinh Dong Huu - trinh.dong@ncl.ac.uk

12:00 - 12:25

Robust dynamic borrowing designs for randomized basket trials: a case study from the ultra-rare invasive mold infections

Satrajit Roychoudhury - satrajit.roychoudhury@pfizer.com

Session 5 — Amphi 11

Some Advanced Statistical Learning Methods for Modern Scientific Data

Organizer: Lexin Li - lexinli@berkeley.edu and chair TBD
Chair: Peter Song - pxsong@umich.edu

13:30 - 13:55
Modeling non-uniform hypergraphs using determinantal point processes
Ji Zhu - jizhu@umich.edu

13:55- 14:20
Structure-aware model-free algorithms for continuous-time reinforcement learning
Yuhua Zhu - yuhua.zhu@stat.ucla.edu

14:20- 14:45
Covariate-adjusted topological inference and learning
Moo Kyung Chung - mkchung@wisc.edu

14:45- 15:10
Affiliation: Ranking inference for human feedback tuning in large language models
Junwei Lu - junweilu@hsph.harvard.edu

Session 6 — Amphi Louis

Joint models for risk prediction according to marker variability

Organizer: Helene Jacqmin-Gadda
helene.jacqmin-gadda@u-bordeaux.fr

13:30 - 13:55
Flexible Bayesian semi-parametric approaches for modelling within-individual variability in joint models
Jessica Barrett - jessica.barrett@mrc-bsu.cam.ac.uk

13:55- 14:20
Joint models with heteroscedastic residual variance: an application to the impact of blood pressure variability on competing health events
Leonie Courcoul - leonie.courcoul@u-bordeaux.fr

14:20- 14:45
Measuring Biomarker Variability for Survival Data
Jianxin Pan, China - jianxinpan@uic.edu.cn

14:45- 15:10
Joint Modeling of Multiple Longitudinal Biomarkers and Survival Outcomes via Threshold Regression: Variability as a Predictor
Michael Elliott - mrelliot@umich.edu

Session 7 — Amphi 10

Recent Developments in Survival Analysis

Organizer: Yifan Cui - yifanc095@gmail.com

13:30 - 13:55
On an extension of the Cox model for time-dependent covariates under dependent censoring with unknown association
Ingrid Van Keilegom - ingrid.vankeilegom@kuleuven.be

13:55- 14:20
Semiparametric Regression Analysis of Interval-Censored Data
Danyu Lin - lin@bios.unc.edu

14:20- 14:45
Simultaneous Confidence Bands for Time-Varying Hazard Ratios with Interval-Censored Data
Donglin Zeng - dzeng@umich.edu

14:45- 15:10
Adaptive Mixture-of-Experts Transformers for Joint Modeling of Irregular Longitudinal and Survival Data
Zhe Fei - zhef@ucr.edu

Session 8 — Amphi 12

Trustworthy analysis of healthcare and medical data

Organizer: Fang Liu - Fang.Liu.131@nd.edu
and Boris Hejblum
boris.hejblum@u-bordeaux.fr

13:30 - 13:55
An Agentic AI System for Multi-Framework Communication Coding
Chuan Hong - chuan.hong@duke.edu

13:55- 14:20
Mathematical Foundations of Generative AI for Human Genetics and Epigenetics
Xinghua Mindy Shi - mindyshi@temple.edu

14:20- 14:45
Towards Differentially Private Finite Population Estimation: An Approach Based on Survey Weight Regularization
Yajuan Si - yajuan@umich.edu

14:45- 15:10
A Differentially Private Weighted Empirical Risk Minimization Procedure and its Application to Outcome Weighted Learning
Fang Liu - Fang.Liu.131@nd.edu

Session 9 — Amphi 11

Recent developments in reinforcement learning methods for precision medicine

Organizer: Donglin Zeng - dzeng@umich.edu

15:40- 16:05
DoubleGen: Debiased Generative Modeling of Counterfactuals
Alex Luedtke - aluedtke@uw.edu

16:05- 16:30
Model-free dynamic treatment regimes with arbitrary number of treatments and stages
Nilanjana Laha - nilanjanaaa.laha@gmail.com
16:30- 16:55
Learning Optimal Early Decision Treatment Rules with Multi-domain Intermediate Outcomes
Yuanjia Wang - yw2016@cumc.columbia.edu

Session 10 — Amphi Louis

Distributional and Quantile Regressions for complex response data
Organizer: Antoine Barbieri
antoine.barbieri@u-bordeaux.fr

15:40- 16:05
On asymmetric Laplace regression models: application to trophic diversity
Angelo Alcaraz - angelo.alcaraz@ens-paris-saclay.fr
16:05- 16:30
Efficient Estimation in Quantile Mixed Models via Smooth Check-Loss Approximation
Lei Liu - lei.liu@wustl.edu
16:30- 16:55
A joint model based on distributional regression to study the link between blood pressure and the risk of cerebral vasospasm.
Mouna Abed - mouna.abed@u-bordeaux.fr
16:55- 17:20
Optimal-transport based conformal prediction
Gauthier Thurin - Gauthier.thurin@ens.fr

Session 11 — Amphi 12

Innovative Statistical Methods for Complex Health and Biomedical Data
Organizer: Mei Hao - hao.mei@ruc.edu.cn

15:40- 16:05
~~**A Performance-Based Framework for Transfer Learning Measurement and Guidance**~~
~~*Hao Zhang - haozhang@arizona.edu*~~
16:05- 16:30
BELIEF in Dependence
Kai Zhang - zhangk@email.unc.edu
16:30- 16:55
Brain Encoding and Decoding: Some Examples
Lexin Li - lexinli@berkeley.edu
16:55- 17:20
Functional Latent Space Model for Time-Varying Networks: Application to Taiwan Administrative Claims Data
Hao Mei - hao.mei@ruc.edu.cn

Session 12 — Amphi 10

High-dimensional surrogate markers in multi-outcome settings
Organizer: boris Hejblum
boris.hejblum@u-bordeaux.fr

15:40- 16:05
Resilience Measures for the Surrogate Paradox
Layla Parast - parast@austin.utexas.edu
16:05- 16:30
Meta-Analytic Evaluation of Complex Surrogate Endpoints based on the Surrogate Index
Florian Stijven - florian.stijven@kuleuven.be
16:30- 16:55
Stable Multi-Surrogate Transformation for Robust and Generalizable Surrogacy
Tianxi Cai - tcai@hsph.harvard.edu
16:55- 17:20
Surrogate endpoint evaluation for outcomes with high-dimensional features, with application to vaccines
Peter Gilbert - peterg@uw.edu

Session 13 — Amphi 12

Recent advances in transfer learning for biomedical applications

Organizer: Lan Luo - ll1118@sph.rutgers.edu

9:00 - 09:25
Unsupervised Aggregation of Multiple Learning Algorithms
Rui Duan - rduan@hsph.harvard.edu

9:25 - 09:50
Heterogeneity-adaptive meta-analysis
Emily C Hector - ehector@umich.edu

9 :50 - 10:15
Hierarchical Projection for Adaptive Knowledge Transfer
Tian Gu - tg2880@cumc.columbia.edu

10:15 - 10:40
On a synergistic learning phenomenon in nonparametric domain adaptation
Ling Zhou - zhouling@swufe.edu.cn

Session 14 — Amphi Louis

Clustering from multivariate data

Organizer: Anais Rouanet anais.rouanet@u-bordeaux.fr and Julie Fendler julie.fendler@mrs-bsu.cam.ac.uk

9:00 - 09:25
Clustering of Multivariate Longitudinal Data of mixed type
Julien Jacques - julien.jacques@univ-lyon2.fr

9:25 - 09:50
Consensus Monte Carlo for mixtures of categorical distributions
Julie Fendler - julie.fendler@mrc-bsu.cam.ac.uk

9:50 - 10:15
Non-parametric clustering of multivariate longitudinal data with variable selection: Identifying sub-phenotypes of Alzheimer's Disease
Anais Rouanet - anais.rouanet@u-bordeaux.fr

10:15 - 10:40
A Dynamic Joint Latent Class Model With Time-Dependent Transition Probabilities
Qendresa Selimi - qendresa.selimi@manchester.ac.uk

Session 15 — Amphi 10

The use of functional data analysis in multivariate settings

Organizer: Helene Jacqmin-Gadda helene.jacqmin-gadda@u-bordeaux.fr

9:00 - 09:25
Functional joint model for longitudinal and survival data with a functional covariate with application to a longitudinal study of objective physical activity
Luo Xiao - lxiao5@ncsu.edu

9:25 - 09:50
Estimation and Application of Derivative Multivariate Functional Principal Component Analysis
Andrew Simpkin - andrew.simpkin@universityofgalway.ie

9:50 - 10:15
Random Survival Forest for the prediction of survival outcomes from time-varying outcomes using functional principal component analysis
Robin Genuer - robin.genuer@u-bordeaux.fr

10:15 - 10:40
~~**Preliminary Test Estimation in ULAN models for Functional Data**~~
~~*Sophie Dabo - sophie.dabo@univ-lille.fr*~~

Session 16 — Amphi 11

New advances in survival analysis and machine learning

Organizer: Yichuan Zhao - yichuan@gsu.edu and Liang Li - lli15@mdanderson.org

9:00 - 09:25
Prediction Machines Based on Concordance Correlation
Edsel Pena - pena@stat.sc.edu

9:25 - 09:50
Double Machine Learning of Continuous Treatment Effects with General Instrumental Variables
Yifan Cui - yifanc095@gmail.com

9:50 - 10:15
Modeling the Association Between Multivariate Nonlinear Longitudinal Data and Survival Outcome: A Measurement Error Perspective
Liang Li - lli15@mdanderson.org

10:15 - 10:40
Novel empirical likelihood method for the cumulative hazard ratio under stratified Cox models
Yichuan Zhao - yichuan@gsu.edu

Session 17 — Amphi 11

Statistical Learning for Complex Data

Organizer: Xingqiu Zhao - xingqiu.zhao@polyu.edu.hk

Chair: Yu Gu - yugu@hku.hk

11:10 - 11:35
Semiparametric Inference for Functional Survival
Qixian Zhong - qxzhong@xmu.edu.cn

11:35 - 12:00
Deep Nonparametric Inference for Interval-Censored Data
Qiang Wu - qiangwu@mail.bnu.edu.cn
12:00 - 12:25
Deep Conditional Generative Learning for Optimal Individualized Treatment Rules
Xiangbin Hu - xiang-bin.hu@connect.polyu.hk

Session 18 — Amphi Louis

Software for the Analysis of Multi-Outcome Models (INLAjoint, JMbayes2, frailtypack …)
Organizer: Denis Rustand
denis.rustand@u-bordeaux.fr

11:10 - 11:35
Graphpcor: Models for correlation matrices based on graphs
Elias Krainski - elias.krainski@kaust.edu.sa
11:35 - 12:00
Assessing surrogacy from joint modeling and mediation analysis when surrogates are either censored event times or longitudinal biomarker: cancer application
Virginie Rondeau - virginie.rondeau@inserm.fr
12:00 - 12:25
INLAjoint and beyond: INLA for multi-outcome modeling
Janet van Niekerk - janet.vanNiekerk@up.ac.za
12:25 - 12:50
The JMbayes2 R package for joint models of longitudinal and time-to-event data: From flexible fitting to dynamic prediction and validation
Pedro Miranda-Afonso
p.mirandaafonso@erasmusmc.nl

Session 19 — Amphi 10

Advanced Analytical Methods in Multi-outcome Data
Organizer: Lei Liu - lei.liu@wustl.edu

11:10 - 11:35
Function-on-Scalar Regression with Ultra high-Dimensional Error-Prone Covariates
Grace Y. Yi - gyi5@uwo.ca
11:35 - 12:00
Time-varying frailty model for analyzing recurrent/terminal event data
Shalini Ramachandra
shalini.ramachandra@pennmedicine.upenn.edu
12:00 - 12:25
Inference for Deep Neural Network Estimators
Yi Li - yili@umich.edu

Session 20 — Amphi 12

Causal Learning for Optimal Health Decision-Making with Complex Outcomes
Organizer: Yuanjia Wang
yw2016@cumc.columbia.edu

11:10 - 11:35
Estimating the optimal allocation of kidneys in the presence of competing risks from clustered data
Erica Moodie - erica.moodie@mcgill.ca
11:35 - 12:00
A structural nested rate model for estimating the effects of time-varying exposure on recurrent event outcomes
Ashken Ertefie - Ashkan.Ertefaie@PennMedicine.upenn.edu
12:00 - 12:25
Learning Locally Interpretable Individualized Treatment Rules
Yuan Chen - cheny19@mskcc.org
12:25 - 12:50
Joint Model for Mediation Analysis with Causally Related Longitudinal and Recurrent Event Mediators for Survival Outcome
Cheng Zheng - cheng.zheng@unmc.edu

Session 21 — Amphi 10

Statistical and machine learning methods for complex biomedical data

Organizer: QI Long - qlong@pennmedicine.upenn.edu
Chair: Kevin He - kevinhe@umich.edu

14:00 - 14:25
A Robust Local Frechet Regression Using Unbalanced Neural Optimal Transport with Applications to Dynamic Single-cell Genomics Data
Hongzhe Li - hongzhe@upenn.edu

14:25 - 14:50
iDeepViewLearn+: Interpretable AI for Robust and Fair Multimodal Data Integration
Sandra Safo - ssafo@umn.edu

14:50 - 15:15
Ranking-based Data Integration for Robust Outcomes Prediction and Biomarker Detection
Nicholas Henderson - nchender@umich.edu

Session 22 — Amphi Louis

Causal inference in presence of truncation by death

Organizer: Cecile Proust-Lima
cecile.proust-lima@u-bordeaux.fr

14:00 - 14:25
Causal effects on non-terminal event time with application to antibiotic usage and future resistance
Daniel Nevo - danielnevo@gmail.com

14:25 - 14:50
Bias-Corrected Two-Stage Modeling for Joint Analysis of Multidimensional HRQoL and Survival
Catherine Legrand - catherine.legrand@uclouvain.be

14:50 - 15:15
A path-specific effect approach to mediation analysis with time-varying mediators and time-to-event outcomes accounting for competing risks
Arce Domingo-Relloso - ad3531@cumc.columbia.edu

15:15 - 15:40
Evaluating Treatment Effects in Longitudinal Trials with Truncation by Death: An Assumption-Lean Approach
Stijn Vansteelandt - stijn.vansteelandt@ugent.be

Session 23 — Amphi 11

Innovative Statistical Methods for Longitudinal and Survival Analysis in Medical Studies

Organizer: Yanqing Sun - yasun@charlotte.edu

14:00 - 14:25
Joint models in longitudinal studies for efficient and robust inferences
Lang Wu - lang@stat.ubc.ca

14:25 - 14:50
Enhanced survival trees with applications to Alzheimer's disease study
Jimin Ding - jmding@wustl.edu

14:50 - 15:15
Boosting methods for interval censored data with regression and classification
Wenqing He - whe@stats.uwo.ca

15:15 - 15:40
Estimation and Inference of Semiparametric Temporal Intensity Models for Recurrent Events with Application to a Malaria Vaccine Trial
Yanqing Sun - yasun@charlotte.edu

Session 24 — Amphi 12

New Estimation and Inference Methods for Analyzing Composite Survival Outcomes

Organizer: TBD
Chair: Yichuan Zhao - yichuan@gsu.edu

14:00 - 14:25
On statistical inference of multiple competing risks in oncology clinical trials
Chen Hu - huc@jhu.edu

14:25 - 14:50
Win odds for Sequential Multiple Assignment Randomized Trials
Yu Cheng - yucheng@pitt.edu

14:50 - 15:15
Variable Selection for Time-Varying Covariates in Multistate Survival Models with Interval Censoring
Ariane Bercu - ariane.bercu@u-bordeaux.fr

15:15 - 15:40
Joint Modeling of True and Misclassified Event Times for Biomarker Evaluation
Yingye Zheng - yzheng@fredhutch.org

Session 25 — Amphi 11

Machine Learning and Survival Analysis

Organizer: Jiaoguo Sun - sunj@missouri.edu
Chair: Qixian Zhong - qxzhong@xmu.edu.cn

16:10 - 16:35
Semiparametric Functional Multi-State Models: Estimation and Testing with Application to Alzheimer's Disease
Yu Gu - yugu@hku.hk

16:35 - 17:00
Spline Learnable Neural Networks with Applications to Generative Diffusion Models
Jiaqi Zhao - jiaqi2025.zhao@connect.polyu.hk

17:00 - 17:25
Automatic structure identification and variable selection for additive accelerated failure time model

with ultra high dimensional covariates
Li Liu - lliu.math@whu.edu.cn
17:25 - 17:50
Deep Semiparametric and Nonparametric Inference for Longitudinal Data
Rujia Cao - rujia.cao@connect.polyu.hk

Session 26 — Amphi Louis

Area of causal inference
Organizer: Cheng Zheng - cheng.zheng@unmc.edu

16:10 - 16:35
Joint Analysis of Multivariate Longitudinal Data and Interval-Censored Event Time Data with Application to Huntington's Disease Progression
Ying Zhang - ying.zhang@unmc.edu
16:35 - 17:00
Model-free High Dimensional Mediator Selection with False Discovery Rate Control
Ran Dai - ran.dai@unmc.edu
17:00 - 17:25
Confidence Sets for Causal Orderings
Mladen Kolar - mkolar@marshall.usc.edu
17:25 - 17:50
Doubly robust inference for the heterogeneous treatment effect of multiple treatments on time-to-event outcomes
Youngjoo Cho - yvc5154@konkuk.ac.kr

Session 27 — Amphi 10

Joint analysis of time-to-event or longitudinal markers in the presence of mortality as a competing risk
Organizer: Sebastien Haneuse
shaneuse@hsph.harvard.edu

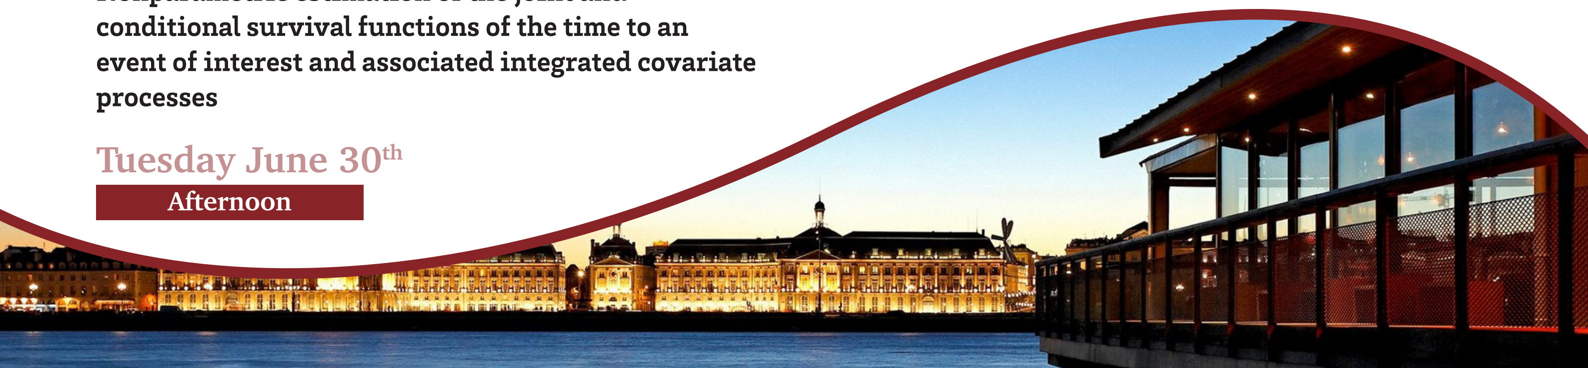
16:10 - 16:35
Challenges and Opportunities in Joint Modelling of Multiple Longitudinal and Survival Outcomes
Eleni-Rosalina Andrinopoulou
eleni.r.andrinopoulou@gsk.com
16:35 - 17:00
A Bayesian Nonparametric Approach for Semi-Competing Risks with Application to Cardiovascular Health
Daniels, Michael J - mdaniels@stat.ufl.edu
17:00 - 17:25
A novel framework for Joint prediction of longitudinal markers and death
Sebastien Haneuse - shaneuse@hsph.harvard.edu
17:25 - 17:50
Nonparametric estimation of the joint and conditional survival functions of the time to an event of interest and associated integrated covariate processes
Sangita Kulathinal - sangita.kulathinal@helsinki.fi

Session 28 — Amphi 12

Nonparametric and semiparametric modeling for the analysis of complex data
Organizer: (Zhezhen Jin - zj7@cumc.columbia.edu)

Chairs Ariane Bercu - ariane.bercu@u-bordeaux.fr

16:10 - 16:35
Robust causal effect estimation in high-dimensional survival analysis using sufficient dimension reduction
Shanshan Ding - sding@udel.edu
16:35 - 17:00
Variable Selection in the Joint Frailty Model of Recurrent and Terminal Events Using Broken Adaptive Ridge Regression.
Xuewen Lu - xlu@ucalgary.ca
17:00 - 17:25
Modeling Heterogeneous Disease Processes Using a Mixture of Multistate Hidden Markov Models
Leilei Zeng - lzeng@uwaterloo.ca
17:25 - 17:50
Integrative Analysis of Multiple Data Sources Involving Misclassification and Missing Data
Hua Shen - hua.shen@ucalgary.ca



Session 29 — Amphi Louis

Machine or deep learning for multiple longitudinal and survival data

Organizer: Virginie Rondeau
virginie.rondeau@inserm.fr

9:00 - 09:25
Joint models and deep learning neural networks for the longitudinal analysis of mammography images in screen-detected breast cancer risk prediction
Manel Rakez - rakez.manel@outlook.fr

9:25 - 09:50
Deep Learning for Longitudinal and Survival Data: Toward Realistic Synthetic Patient Generation
Agathe Guilloux - agathe.guilloux@inria.fr

9:50 – 10 :15
Modeling disease progression and treatment switches in rare disease trials by integrating statistical modeling and synthetic experts
Clemens Schaechter - clemens.schaechter@ uniklinik-freiburg.de

10:15 - 10:40
Neural differential equations enhanced linear mixed model
Cécile Proust-Lima - cecile.proust-lima@u-bordeaux.fr

Session 30 — Amphi 11

Causal mediation pathway analysis

Organizer: Peter Song - pxsong@umich.edu

9:00 - 09:25
Spillovers Through Time: A Neural Framework for Temporal Network Data and Dynamic Causal Effect Estimation
Jiasheng Shi - shijiasheng@cuhk.edu.cn

9:25 - 09:50
Semiparametric mediation analysis using single-index models
Yen-Tsung Huang - ythuang@stat.sinica.edu.tw

9:50 – 10:15
Mitigating Unmeasured Confounding Bias in Large-Scale Causal Mediation Analysis Via Factor Analysis in Epigenome-Wide Studies
Zhonghua Liu - zl2509@cumc.columbia.edu

10:15 - 10:40
Statistical Inference for Mediation Models with High Dimensional Exposures and Mediators
Wei Zhou - zhouwei23@swufe.edu.cn

Session 31 — Amphi 10

Advanced uses of joint modeling techniques with application in longitudinal and time-to-event data

Organizer: Dimitris Rizopoulos
d.rizopoulos@erasmusmc.nl

9:00 - 09:25
Dynamic Predictions and Predictimands for Salvage Therapy in Recurrent Prostate Cancer Using Joint Models
Jeremy Taylor - jmgt@umich.edu

9:25 - 09:50
Scalable Time-Dynamic Joint Models for Multilevel Health Data
Esra Kurum - esra.kurum@ucr.edu

9:50 – 10:15
Shared parameter modeling of longitudinal data allowing for possibly informative visiting process and terminal event
Christos Thomadakis - cthomadak@aueb.gr

10:15 - 10:40
Addressing measurement times that are not at random in longitudinal data through joint modelling of outcomes and latent disease processes
Eleanor Pullenayegum
eleanor.pullenayegum@sickkids.ca

Session 32 — Amphi 12

Tensor-Train Methods, Partial Derivatives, and High-dimensional Inference in Modern Statistics

Organizer: Yong Chen
ychen123@pennmedicine.upenn.edu

9:00 - 09:25
PDA: a unified framework for lossless, one-shot, federated learning algorithms
Yong Chen - ychen123@pennmedicine.upenn.edu

9:25 - 09:50
Projection-Enhanced Interpolation-Based Tensor-Train Decompositions for One-Shot, Privacy-Preserving Distributed Inference
Jingmei Qiu - jingqiu@udel.edu

9:50 – 10:15
Statistical Learning via Partial Derivatives
Xiaowu Dai - dai@stat.ucla.edu

10:15 - 10:40
High-dimensional Data Assimilation for Large Scale Physical Systems
Yumou Qiu - qiuyumou@math.pku.edu.cn

One invited KEYNOTE Speech — Amphi Louis

11:10 - 12:10
Harnessing Variational Auto-Encoders for Fitting Deep Mixed-Effects Models
Dimitris Rizopoulos, Erasmus University Medical Center - d.rizopoulos@erasmusmc.nl
